

VOLUNTARY RECALL OF THE OMER ZERO³ MASK MANUFACTURED BEFORE NOVEMBER 2012

Dear Valued Customer,

Omersub S.p.A. has decided to make a voluntary Recall of the OMER Zero³ black masks manufactured prior to November 2012.

The reason for this voluntary recall is a non-conforming type of glass which was used for the lens which could be susceptible to breakage resulting in possible injury. There have not been any reported injuries.

The Zero³ masks manufactured prior to November 2012 are recognizable by a shiny silicone facial skirt while those produced after that date (and NOT subject to recall) have the facial skirt in matte finish silicone.

The Zero³ mask in colors "Mud" and "Olive" are not involved in this recall.

**Mask manufactured
before November 2012
with shiny facial skirt
(subject to Recall)**

**Mask manufactured
after November 2012
with matte finish facial skirt
(NOT subject to Recall)**

Any defective Zero3 mask returned to an OMER authorized dealer will be replaced at no charge.

We sincerely apologize for this inconvenience.
